

For Sushi Restaurants All Over the World

Tokyo Sushi Collection
Miyake Ceramics Co., Ltd.
Japan

Located in Gifu-Prefecture, the very central part in Japan, we were founded in 1976 and started providing ceramic tableware products to the domestic hotels & restaurants.

Thanks to rich natural resources, Gifu has a thousand year tradition of ceramic production. Especially it had a golden age in the late 16th century, when many war lords preferred tea ceremony, called “Cha no Yu” or “Matcha”.

Time goes by and Gifu has become the largest ceramic town in Japan. More than 50% of the ceramic products consumed in Japan are produced in our region.

During the first decade of 21st century, Japanese cuisine had become very popular among the world. In addition to the most popular Sushi and Tempura, Tofu, Udon, Ramen etc, more and more dishes are being introduced to the world.

It is often said that Japanese cuisine is tasted not only by tongue but also by eye. Chefs are always thinking about how to display dishes to the guests. For example, a chef may try to express “4 Seasons” within one bento box. Or another chef may try to display grilled fish as if still swimming in a river.

In order to materialize Chef's idea, Japanese tableware has developed huge variety of shapes & designs.

It is not only traditional, but also contemporary or mixed. Hundreds of

small local kilns are firing products day by day. In the first week of January,

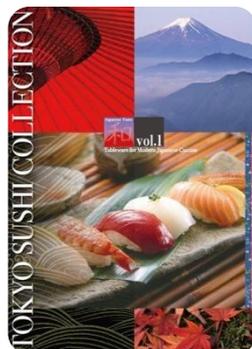

lots of new products are displayed in a trade show and waiting to be introduced to the chefs.

As the number of overseas Japanese restaurants increases, we often get to receive inquiries and orders from overseas customers. It is great pleasure for us that our products are used in the restaurants all over the world. But at the same time, we realized that we needed to publish a new catalog for overseas restaurants.

Before then, we only had a catalog, which is described in

Japanese. It has huge variety but a little complicated to overseas customers. Then, we published the catalog, "Tokyo Sushi Collection".

The items are simply described and categorized in English. And it lists many kinds of ceramic shapes & styles widely, which are essential for Japanese cuisines. Not only ceramic plates, but also wooden tableware, glassware, and lacquer ware will be necessary to operate restaurants. Japanese unique kitchen tools, either.

"Tokyo Sushi Collection" will provide you one stop service to all kinds of kitchen equipment.

The catalog is available both paper book and PDF file. PDF can be downloaded at our website: www.tablewarefactory.co.jp

Your question and inquiry request is always welcomed.

Please feel free to contact us.
